Dear HR Manager,

Reference to the Data Scientist opportunity, it's very appealing to me and I believe this position is right down my alley. I am confident that I am a strong candidate for Data Science role, as I possess good blend of Statistics, Technical skills and Business Domain knowledge.

In my last few Data Science projects, I have developed predictive analytics utilizing Supervised/Un Supervised Machine Learning techniques like Linear Regression Model, Support Vector Machine, K Nearest Neighbors, Principal Component Analysis, K Means Clustering and many more.

Apart from my industry experience, I also possess academic experience as I have strong statistical and Data Science knowledge. I had been an Adjunct Professor at New York University, Rutgers University and University of Texas at Austin, where I had taught courses in Data Science, Statistics and Finance. Above all I have done my under graduation from IIT Madras and MBA from Cornell University.

Please find my resume attached here and looking forward to hear from you!

Regards, Odie Pichappan.
